Getting Started with eLearning

eLearning Overview

Technical Requirements

In addition to a confident level of computer and Internet literacy, certain minimum technical requirements must be met to enable a successful learning experience.

Browsers and Operating Systems

- View Blackboard’s Browser and OS Requirements for 9.1.

Software

- Microsoft Office 365 (Login required) supported by UT Dallas Office of Information Technology (OIT) is available for all students to use.
- Your course may use Teams for class meetings and Stream for accessing recorded class lectures and sessions. Please see below some resources and tutorials:
  - OIT Microsoft Teams website
  - OIT Office 365 Training and Resources
Course Access and Navigation

Students must have a UT Dallas NetID and password to log into the eLearning server and access the course.

New students can go to the UT Dallas NetID page at http://netid.utdallas.edu to initiate their account shortly before or at the start of the semester. Students can use this account to access all of UT Dallas eLearning classes (including those on the eLearning Pilot server) plus other UTD computing systems (i.e. your UT Dallas email account). Please note that the account password must be updated every 6 months. Users will receive a reminder message to their UT Dallas email accounts from UTD's Information Resources department prior to the password expiration. To update the account password, please login to the NetID webpage. For more information, please visit the NetID FAQ's page.

The URL to access the eLearning server is http://elearning.utdallas.edu. Courses may be accessed at any time after the semester starts. Once logged in, students will see the "My eLearning" page. Here students will see their "Course List" which contains links to course content on the eLearning server. Students can click the course title to access the course Home Page.

eLearning Tools and Functionality

There are several built-in tools instructors can choose to use in order to facilitate learning, communication, interaction, and collaboration. Please visit the eLearning Tutorials page to view video tutorials on many of the tools and settings available.

Email - To access UT Dallas' student email, please visit Galaxy. If you need any help, please visit the IR's How To webpage.
